I am a Fresh Graduate of Amikom University Yogyakarta, from the D3 Informatics Engineering study program, with expertise in backend application development using the Java Spring Framework. Through internships at technology companies, intensive bootcamps in software development, and programming-related courses, I have built a strong foundation in efficient and scalable backend development.

EDUCATION

Amikom University - **Yogyakarta**   Sep 2021 - Aug 2024

Diploma in Informatics Engineering, 3.55/4.00

- Algorithms and Data Structure.
- Database Design.
- Website Design.

EXPERIENCE

PLN Icon Plus - **Jakarta Selatan (On-site)**   Sep 2023 - Jan 2024

Java Backend Developer Intern

- Develop a Restful API, Consume API as an intermediary between database and client using Java Springboot and Retrofit.
- Involved in the development of the IOffice Plus Database team for employee online attendance system operations.
- Build a monitoring toddler application using Java, Spring Boot, and SQL Server.
- Present performance, results, and jobdesk as a Java Spring Backend Developer.
- Create API documentation in the form of Swagger and perform Unit Testing.
- Analysis of System and Data Structure Requirements.
- Create an ERD (entity relationship diagram).
- Create a stored procedure in SQL Server.
- Performance reporting during intern.

PT. Angga Membangun Indonesia - **Jakarta (Remote)**   Jul 2022 - Oct 2022

Full-Stack Developer Bootcamp

- Analysis of System Requirements and Data Structures.
- Create a doctor appointment application.
- Create an ERD (entity relation diagram).
- Slicing UI Design.
- CRUD.

Amikom Center - **Yogyakarta (Remote)**   May 2022 - Jun 2022

Full-Stack Developer Intern

- Build an e-commerce application.
- Algorithms and Data Structure.
- Slicing UI Design.
- CRUD.

PROFESSIONAL SKILLS

Hard Skills

- Knowledge of Java, Spring Boot, React js, MySQL, SQL Server, Rest API, Consume API, Microservice, Docker, RabbitMQ, Message Broker, and Redis caching.

Soft Skills

- Able to work in a team or individually, Have good problem-solving logic, and a strong business process analysis ability for technical solutions that match actual business needs.

PROJECTS

- **E-Balita** (2024): Build a Backend Services Monitoring Toddler application using Java, Spring Boot, and SQL Server.
- **Order-Product** (2023): Build a Backend Services Order-Product using Java, Spring Boot, and SQL Server.
